

You don't have to go to great lengths to avoid interference

When EMC test facilities are much closer to home

As part of Anglia's commitment to providing excellent technical support for the electronics industry, we are now able to offer comprehensive EMC test facilities through our associate company Anglia Designs. Based in a newly opened UK technology centre, employing state-of-the-art equipment, the clean environment allows repeatable tests without the uncertainty of external sources of interference.

For more information on this invaluable service and details of other facilities and capabilities, contact
