

# MCU Seminars 2007

Anglia are pleased to announce that we are holding the following **FREE** one day MCU Seminars, in conjunction with our partner STMicroelectronics, in various locations around the UK and Ireland.

<b>Chelmsford</b>	<b>26th April</b>
<b>Leeds</b>	<b>15th May</b>
<b>Milton Keynes</b>	<b>23rd May</b>
<b>Bristol</b>	<b>12th June</b>
<b>Newbury</b>	<b>19th June</b>
<b>Nottingham</b>	<b>26th June</b>
<b>Gatwick</b>	<b>4th July</b>
<b>Cambridge</b>	<b>17th July</b>

These Seminars will focus on STMicroelectronics' range of 8-bit to 32-bit microcontrollers with particular emphasis on their market leading ARM7 and ARM9 families which are targeted for designers of electronic consumer, industrial, automotive, medical devices and general embedded systems.

Each Seminar will benefit design engineers who can invest one day with industry professionals where they will be able to discover and evaluate ST's innovative MCU product lines.

Demonstrations of the ground breaking STR7/STR9 will enable engineers to investigate 32-bit ARM architectures, which bring ARM power to the price point of 8 and 16-bit micro's, allowing easy migration into the 32-bit world.

**To assist evaluation free development tools will be made available.**

To register for any of these MCU Seminars please visit [www.anglia.com/seminars](http://www.anglia.com/seminars) where further details can also be found. Lunch and refreshments will be provided throughout.
