**intersil**® **anglia**

Intersil Corporation is a global technology leader specialising in the design and manufacture of high performance analog semiconductors. Built on a solid foundation, with many years of analog experience, Intersil has developed a world-class product range comprising of building-block devices through to high precision solutions.

**QUELLAN**  
MORE SIGNAL | LESS NOISE®

Quellan, now part of Intersil, designs and markets specialised analog integrated circuits that dramatically improve the signal integrity of transmission signals. These IC's combine the low power consumption of an analog circuit with DSP-like performance and versatility.

**BRINGING PREMIUM AUDIO TO A HIGH DEFINITION WORLD**

With the acquisition of D2Audio, Intersil is able to deliver an immersive audio experience with the world's only intelligent audio amplifier.

# Design guidance? Anglia can support you!

Intersil devices offer exceptional performance but like all analog technology often require specialist design techniques and skills if they are to achieve their full potential.

Anglia have put together a expert analog design team that are fully qualified to deliver this expertise, and have real hands-on experience of designing with leading edge products. This gives you the satisfaction that your design is in good hands, while our field application team are available to help guide you during your product assessment.

Anglia are also AS9120 certified. If you are designing for the space and defence or other high reliability markets, we have the technical knowledge and logistics to support you.

- Precision analog
- High speed ADCs
- Intelligent power management
- Video & audio ICs
- LED drivers
- Industry standard interface products & amplifiers
- Reference boards

Give us a call or drop us an email and let us show you how we can help.

Intersil's new innovations for high brightness LED system
