## Anglia invests in Hi-Rel business division

**Wisbech, UK, 14 February 2010** – Anglia today announced the formation of Anglia Hi-Rel a new specialist business division addressing customers in key aerospace, defence, industrial and medical market sectors.

Anglia is accredited and qualified to the most demanding quality and supply standards in order to offer high reliability products and meet stringent supply chain requirements. A signatory of the ADS SC21 programme, Anglia holds AS9120, ISO9001, ISO14001 accreditations and IECQ-CECC qualification which ably demonstrate Anglia’s abilities to fully support the supply chain requirements specific to these industries.

Steve Rawlins, CEO at Anglia, said, “Anglia has made a very significant investment in enhancing and developing its supply chain capabilities for specialist high reliability markets. The formation of Anglia Hi-Rel as a specialised business allows us to address the needs and requirements of these very specialist customers. Suppliers and customers recognise our considerable experience and expertise in logistics and engineering.”

Anglia offers a very high standard of service to its customers, including full lot traceability, full approval documentation, ESD compliant handling and industry/MIL part number translation and conversion. The new Anglia Hi-Rel division markets products from leading blue chip suppliers including AVX, Syfer, Bourns and Intersil.

The new Anglia Hi-Rel business division is supported by its own website [www.anglia-hirel.com](http://www.anglia-hirel.com)

## **About Anglia**

Anglia is the UK's leading independent authorised distributor of semiconductors, optoelectronics, interconnect, and passive and electromechanical components. The company is a signatory of the ADS SC21 programme and holds AS9120, ISO9001, ISO14001 accreditations and IECQ-CECC qualification. Anglia's exceptional technical support spans a fast sampling service, telephone advice from product specialists, on-site visits from field applications engineers and, ultimately, electronics design. An in-house team of designers adds expert resources to customers' design teams, helps reduce final product costs and accelerates development times. Anglia stocks over 700 million components from 500,000 product lines in the UK, and streamlines its customer's logistics and reduces costs through KAN-BAN, EDI, and customer-dedicated inventory.
