

PRODUCT CHANGE NOTIFICATION

MAGNETICS

Certain SRN Semi-Shielded Power Inductor and SRP Shielded Power Inductor Series

Package Cover Tape Change

Riverside, California – March 18, 2021 – In the spirit of continuous improvement, effective June 12, 2021, Bourns will change the package cover tape for certain Model SRN Semi-shielded Power Inductor and SRP Shielded Power Inductor series from a non-static dissipative to a static dissipative material to reduce electrostatic discharge. There will be no change to the dimensions, peeling strength or appearance of the new cover tape. A list of affected part numbers is included on the following pages.

The package cover tape material change has no impact on the form, fit or function of the inductor. The quality and reliability of the inductor should be improved as a result of switching to a static dissipative cover tape.

Implementation dates are as follows:

Date that manufacturing of existing products will cease: **June 12, 2021**

Date that deliveries of modified products will begin: **June 13, 2021**

First date code using the above changes: **2124**

If you have any questions or need additional information, please feel free to contact [Customer Service/ Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.

IC2128
