

21 January 2011

Dear Customer

We have been informed by manufacturer CTC that deliveries commencing from January 2011 of high voltage AC capacitors will undergo a change of epoxy coating to implement Halogen free material. As a result of this process the epoxy colour will change to a darker blue colour, see picture below. This change will not impact the form, fit or function of the device.

Please make the relevant person(s) in your purchasing department aware of this discontinuation to avoid any disruption to your manufacturing.

Yours Sincerely

Anglia
