### Announcement of Color Change for TGS832-A00 and TGS822

Dear Figaro Distributors,

We would like to take this opportunity to inform you of the following changes of body colors for the metal oxide type refrigerant gas sensor TGS832-A00 and the organic solvent vapor sensor TGS822:

Model number	New	Current
TGS832-A00	 Grey	 Black
TGS822	 Grey	 Orange

These changes will be made to continue future productions of these two sensor models. There will be no changes in the sensor specifications, including structure, dimensions, pin connections, and stamp on the sensor top, between the current and new versions.

Expected implementation of this change will be around October 2021 for TGS832-A00, and around August 2022 for TGS822, by the time of which we expect that our stock of the current housing materials will be consumed. Prices of the sensors will remain unchanged.

We would like to ask you, our distributor, to announce this change to all of your customers whom it may concern.

Should you have any questions, please do not hesitate to contact us.

Sincerely yours,

FIGARO ENGINEERING INC.
