### [Extension of the packaging options for male headers with a grid pattern of 1.27 mm \(SLV W 3 / 4 / 5 SMD ...\)](#)

The steadily increasing trend towards packaging forms suitable for automatic machines is unbroken. As a result the inquiries and orders for machine-compatible packaging for connectors in "tape & reel" packaging have increased significantly in recent months. All designs, grid patterns and possible numbers of contacts (depending on type) from 2-contact to 20-contact/ 40-contact are ordered. Where it is necessary and reasonable, a pick and place pad is applied as a plastic moulding or also as a Kapton disc. Those are removed again after the soldering process.

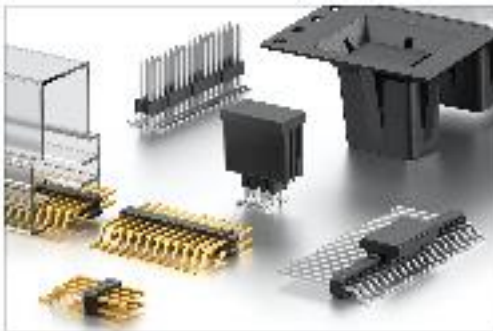

In this context Fischer Elektronik has developed two **new pick and place pads** to ensure the automated placement of male headers with a grid pattern of 1.27 mm. In addition the **SLV W 3 SMD ...; SLV W 4 SMD ... and SLV W 5 SMD ...** male header series can be ordered with pick and place pads in the packaging options bar magazine or tape & reel. We also develop and produce customised bar magazines and tape & reel solutions especially for your application.

Packaging options pick and place pad in bar magazine "... **B SM**" and pick and place pad in tape & reel "... **B TR**" on request.

Please contact us, for further information and inquiries the product experts of Fischer Elektronik GmbH & Co. KG are pleased to be at your disposal.
