

Announcing SS4 Hall-Effect Sensors Change of Manufacturing Location

Honeywell Sensing and Control (S&C) will be transitioning the packaging of our TO-92 Hall-Effect sensors from our packaging site in Juarez, MX to a new supplier in China. The die for these parts will remain unchanged and will continue to be fabricated in their original location.

It should be noted that this is a change in packaging location only – there is no change to the internal die or form, fit and function of the sensor.

We intend to have the manufacture of these TO-92 parts transferred to their new locations as early as August 2014.

Please note in the below chart the parts which are being transitioned and their expected new location for manufacturing.

Part Number	Current Manufacturing Location	New Manufacturing Location
SS40F	Mexico	China
SS441R	Mexico	China
SS443R	Mexico	China
SS445P	Mexico	China
SS460P	Mexico	China
SS460S	Mexico	China
SS461R	Mexico	China
