

04 December 2012

Dear Customer

We have been advised by Jay-Nay Co., Ltd. they have now obtained TUV certification for their range of ceramic safety capacitors and this will replace the existing VDE certification, this change will affect the markings shown on the device. The change does not affect the UL certification or UL markings on the devices.

An example of the new TUV markings are shown below.

This change is with immediate effect on shipments from Jay-Nay Co., Ltd. to Anglia although some stock of parts with the VDE markings still remain. Anglia operates a strict FIFO system in our warehouse facility therefore it may take some time for this change to filter through to customer deliveries.

Please make the relevant person(s) in your purchasing and engineering departments aware of this change to avoid any disruption to your manufacturing.

Yours Sincerely

Anglia
