27th October, 2021

**Announcement of Lot Marking and Lead Wires Taping Changes for
Maxell Oxygen Sensor KE-25 / KE-25F3 / KE-50**

Dear Figaro Distributors,

Please note that two changes are implemented for the following 3 standard models of Maxell Oxygen Sensor: KE-25 / KE-25F3 / KE-50.

Firstly, lot number will be printed on top of the sensor instead of on the side. Original space on the side will be replaced by management number for internal purpose.

Second, noticing that lead wires for the sensors make it difficult for our distributors and customers to handle, store and re-ship, we decided to fix the lead wires onto the sensor body by taping each unit.

You can find the pictures for abovementioned changes in the appendix attached with this announcement.

Both changes apply to all lots since 210901 and will be delivered after the stock of previous lots runs out. Also, the changes do NOT apply to other models than KE-25 / KE-25F3 / KE-50 unless otherwise announced.

Should you have any questions, please do not hesitate to contact us.

Sincerely yours,

Keisyo (Jimmy) En
