# PRODUCT/PROCESS CHANGE INFORMATION PCI13318 – Additional information

# ST MUAR Enhanced traceability with 2D marking for LQFP7x7, LQFP10x10 & LQFP14x14 listed products

# MDG – General Purpose Microcontrollers sub-group (GPM)

## What is the change?

Purpose is to homogenize the marking composition to allow better identification of STM8/STM32 products whatever the production site (for package bigger or equal to 7x7mm body size).

For all listed products marking composition will include 2D information. This enhanced traceability will allow a unique traceability per device from manufacturing to the end customer.

#### Codes already available on current marking:

- PP: Assembly Plant code
- LLL: BE sequence
- WX : Wafer Diffusion Plant code
- SS: ASsembly Sub-Lot
- **COO** : Country Of Origin code
- TF : Test & Finishing site code
- YWW: Year Week (manufacturing date)
- R: Additional Information (Die Version)

Some specific highlights:

- New marking will replace current marking.
- To save some space, "TF" code information has been removed from LQFP48 marking.
- Marking area is broken out into two separate lines to allow maximum information to be displayed.
  - In the new marking condition, the marking area (lines in blue color in above table) will be filled up to the last possible character of the first line and will be resumed on the second line.
- As a consequence, the cardboard box labeling will also display this change, but we may have mismatch between Box Labelling and marking composition of parts inside this box during the transition time for about a few weeks. Refer to below examples of box labeling.
