

February 2026

Notice of Acquisition of Primary Battery Business and Request for Response

(Part 2)

Dear Valued Customer,

We would like to extend our best wishes for your continued success and we would like to express our sincere gratitude for your continued support.

Murata Manufacturing Co., Ltd. (hereinafter referred to as "Murata Manufacturing") (hereinafter referred to as the "Company" ) and its wholly owned subsidiary, Tohoku Murata Manufacturing Co., Ltd. (hereinafter referred to as the "Tohoku Murata Manufacturing" )(" "The battery business" "). As of November 2025, we submitted our first report, "Notice of Acquisition of Primary Battery Business and Request for Response".

As a follow-up to this report, we would like to inform you of the following regarding the succession of UL certified products, the measures to comply with the EU battery regulations, and the changes in the external label descriptions. If you have any questions, please contact the sales representative listed below.

Note

1. Succession of UL Certified Products

The products to be transferred from Tohoku Murata Manufacturing (hereinafter, "Transferred Products") include products certified under UL1642, the safety standard for lithium batteries. All products shipped after March 2026 that have the UL certification mark are certified products that are linked to File No. MH12568 (Maxell). If the name of Tohoku Murata Manufacturing or UL file No. MH12566 is listed in the certification report of UL, IEC, etc. that you have obtained, you may need to apply for a change. In addition, for some models, the registered model names will be changed due to the duplication of names with existing Maxell products (hereinafter referred to as "existing products"). The applicable models are shown in [Attachment 1], and the changes in the display contents are shown in [Attachment 2]. The model name is displayed only for the minimum package unit.

2. About the EU Battery Regulation

The CR coin batteries, SR button batteries and LR button batteries that are the successor products are products that comply with the EU Battery Regulation, which is legally effective in the EU. The same regulations require labeling of "producer" and "importer" on the battery body in principle. However, since it is difficult to label the battery body, we will respond by labeling on the packaging. Changes in the presentation due to the transfer are as shown in Exhibit 3.

3. Other information displayed

At the time of the business transfer, there will be no change in the battery body engraving of the transferred product, including the model name and brand logo. However, products with the indication of "Murata Manufacturing Co., Ltd." on the master carton and cosmetic box will be changed to "Maxell, Ltd." for products manufactured after the transfer. We will contact you individually if you have any request for supplier labeling. For the existing products, there will be no change in the model name, battery body engraving, or other display contents.

4. Future outlook for the model names and brand logos of the Successor Products

The model name and brand logo of the main body of the transferred product will be changed sequentially from the product type that has received approval for product appearance change from each customer. Master cartons, cosmetic boxes and other indications will be changed at the same time.

We will contact you separately with more details on each product.

5. Contact for Sales Inquiries

Please contact our sales representative for any inquiries regarding this matter.

[Attachment 2]

Changes in Labeling Content due to Transfer of UL-Certified Products

Products with the following recognized component mark indicating that they are UL certified products are eligible.

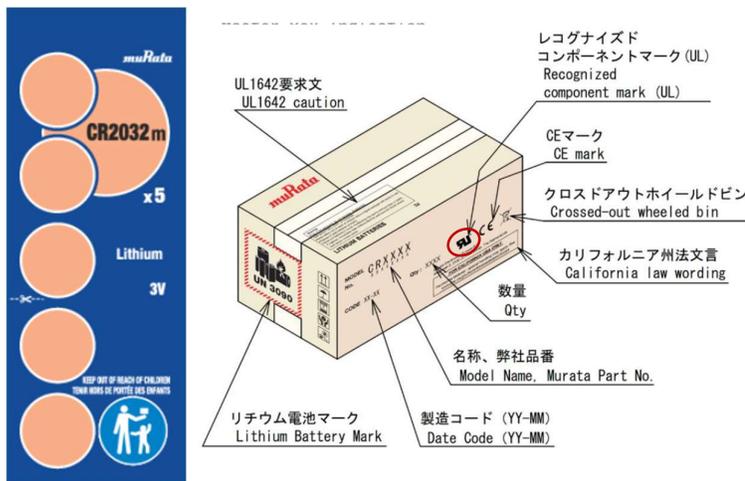

The following table shows the details of the changes in the labeling and the corresponding sections by product type.

| What is displayed | Before | After                    |
|-------------------|--------|--------------------------|
| Model Name        | CRxxxx | CRxxxxm (add "m" at end) |

| Product Type                             | Blister pack of 5 | Bulk          |
|--|-------------------|---------------|
| Display change<br>(Minimum Packing Unit) | Mount             | Master carton |

[Mount] [Master Carton]

\*The above is an example.

\*The change of the display is carried out in stages by ① attaching the sticker of the display after the change or ② changing the printing of the mount itself. Please note that the timing of changing ① and ② may cause ① and ② to be mixed between or within the shipping lot.

[Attachment 3]

Changes in Labeling Content to Comply with EU Battery Regulations

Products with the following CE marking indicating compliance with the EU Battery Regulation are subject to the regulation.

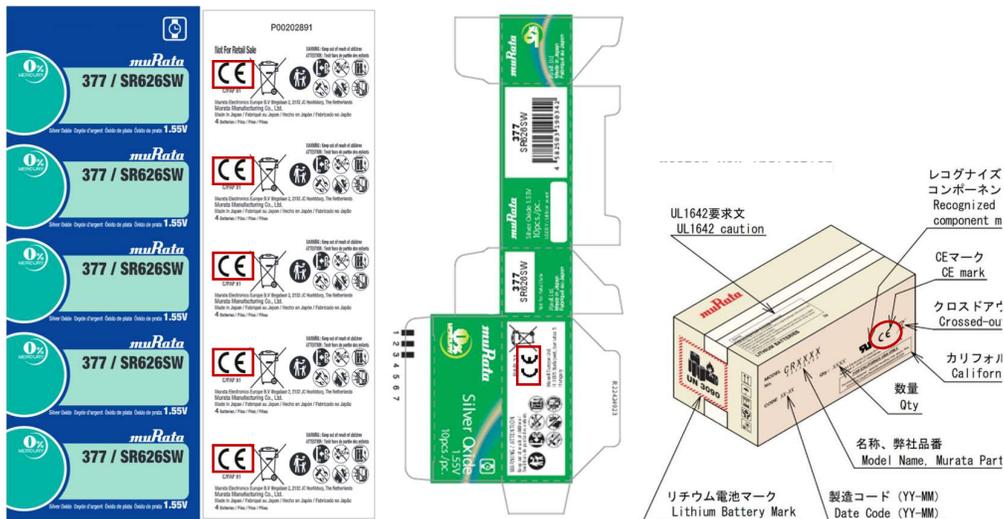

CE marking

The following table shows the changes in the display and the changes by product type.

| What is displayed                          | Before   | After   |
|--|--|---|
| Producer                                   | Murata Manufacturing Co., Ltd.   | Maxell, Ltd.  |
| Importer/Distributor (Importer) / (Seller) | Murata Electronics Europe B.V<br>Wegalaan 2, 2132 JC<br>Hoofddorp, The Netherlands | Maxell Europe Ltd.<br>H-1095 Budapest, Ipar utca 5<br>Hungary |

| Product Type | 5 pcs / 20 pcs blister             | Blister pack | Bulk / Tab    |
|--------------|------------------------------------|--------------|---------------|
| Changes      | Mount /<br>Master Carton (Partial) | Cosmetic box | Master carton |

[Mount] [Decorative Box] [Master Carton]

\*The above is an example.

\*The change of the display is carried out in stages by ① attaching the sticker of the display after the change or ② changing the printing of the mount itself. Please note that the timing

of changing ① and ② may cause ① and ② to be mixed between or within the shipping lot.
