

15 March 2010

Dear Customer

We have been advised by manufacturer OKO with immediate effect they will cease providing VDE approval for the below relay ranges. This decision has been taken due to the low worldwide demand for VDE approval on these relay ranges, it is no longer commercially viable to bare the additional costs associated with maintaining the VDE certifications.

Please note there are no mechanical or electrical changes to the product this change is purely related to the VDE certification, this change does not affect any UL or CSA approvals these parts carry.

We understand this change may have an effect on your end product therefore it is important this information is forwarded on to your engineering teams.

For applications which will still require VDE mark and certification we would like to recommend the equivalent Omron parts shown below where available.

OKO Part number	Omron Alternative VDE Approved
K4MH05	G6RN-1A-5DC
K4MH06	CONSULT ANGLIA
