Bourns® Model SRU3028 & SRU3017 Series Shielded SMD Power Inductors

Soldering Process Change

Riverside, California - February 13, 2024 – In the spirit of continuous improvement, effective August 1, 2024, Bourns will change the soldering process from a manual process to a semi-automated process for the Model [SRU3028](#) and [SRU3017](#) Series Shielded SMD Power Inductors. A list of affected part numbers is included below.

Affected Part Numbers			
SRU3028-100Y	SRU3028-330M	SRU3028-101Y	SRU3017-150Y
SRU3028-150Y	SRU3028-330MH	SRU3017-2R2Y	SRU3017-220Y
SRU3028-220M	SRU3028-330Y	SRU3017-3R3Y	SRU3017-330Y
SRU3028-220MH	SRU3028-330YH	SRU3017-4R7Y	SRU3017-470Y
SRU3028-220Y	SRU3028-470Y	SRU3017-6R8Y	
SRU3028-220YH	SRU3028-680Y	SRU3017-100Y	

The form, fit, function, and country of origin of the affected part numbers will remain the same. Traceability will be maintained through lot code and date code. The quality and reliability of the affected inductors should be improved as a result of the design change.

Samples are available upon request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that products manufactured with the existing process will cease: **July 31, 2024**

Date that deliveries of products manufactured using the new soldering process will begin: **August 01, 2024**

First date code using the above changes: **2431**

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.
