PRODUCT CHANGE NOTIFICATION

Date: January 12th, 2026
PCN: PCN LEDIL 206

Subject: PCN 206 – OLGA holder update and tooling improvements

Description:

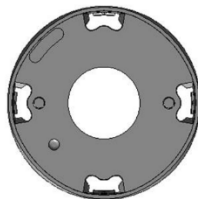

As part of our ongoing product improvement process, **LEDiL will transition the OLGA holder from C16126_OLGA-HLD to C16771_OLGA-HLD2** as the new standard for OLGA-family assemblies.

The updated holder offers increased clearance beneath the assembly, providing extra space for components and solder joints.

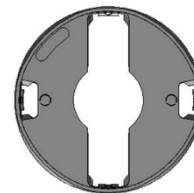

This change does not affect external mechanical dimensions and has no impact on optical or mechanical performance.

Legacy special assembly codes already using HLD2 will be discontinued after the update, as they are no longer needed

Old holder - C16126_OLGA-HLD

New holder - C16771_OLGA-HLD2

In addition, to ensure the highest possible quality, maintenance work has been performed on the tooling. As a result, the mixing surface of the LED cavity for **C16671_OLGA-RS** has been reworked. Additionally, a small VDI texture has been added to the flange area for both C16671_OLGA-RS and **C16673_OLGA-O** to soften potential stray light from this region.
