October 21, 2026

Dear Valued Customers,

This notification supplements PCN # ESW490-48 – IXYS Power Thyristor & Diode TO263 Packaging Location Transfer by adding a previously qualified alternate assembly site to support manufacturing flexibility and ensure continued supply continuity.

As part of our ongoing efforts to strengthen supply resilience and enhance manufacturing flexibility, IXYS is reintroducing a previously qualified assembly site that has a long and proven manufacturing history for these products.

Going forward, production will be supported by both qualified assembly sites to better serve customer demand and ensure continuity of supply. The alternate assembly site has successfully manufactured these products for many years and is fully qualified to support ongoing customer requirements.

This change is intended solely to enhance manufacturing flexibility and supply continuity. Product design, materials, manufacturing processes, and quality controls remain unchanged.

Change Summary

Parameter	Description
Form, Fit, Function	No Change
Bill of Materials (BOM)	No Change
Country of Origin (COO)	Philippines → Philippines / Korea

This notification is for your information and acknowledgement. If you have any other questions or concerns, please contact your local sales team.

We value your business and look forward to continuing to support your needs.

Thank you very much!
