Change of primary assembly plant for Littelfuse IXGF30N400, IXYF30N450, IXYF40N450

Dear Valued Customer,

Following Product Change Notification **LFPCN2402002SXC** dated **February 23, 2024**, which announced the qualification of an alternative, in-house packaging production line for i4Pak IGBTs, Littelfuse would like to inform you of the planned consolidation of i4Pak production onto this in house production line.

Littelfuse has decided to designate the in-house production line as the primary manufacturing source for i4Pak products.

The **IXGF30N400, IXYF30N450, and IXYF40N450** devices are scheduled to begin shipping from the Littelfuse in house factory starting **December 2026**.

Both the legacy and the in-house production lines are fully qualified and equivalent, this consolidation does not impact on product quality, reliability, or performance.

If no feedback is received by **October 5th, 2026**, this notification will be considered acknowledged

For questions or additional information, please contact your Regional Sales Representative or Field Application Engineer.

Best Regards,
Francois Perraud
