

Issue Date: Apr 17th, 2026

Dear Valued Customer,

This PCN C0637 notice is to inform you of an upcoming product change concerning the rare earth materials used in the magnets within our electronic battery disconnect switch product family.

Description of the Change:

The magnets used in the affected product family will incorporate a revised **chemical composition of rare earth elements**.

Reason for The Change:

This update has been initiated as part of our proactive supply chain risk mitigation strategy. Ongoing global market dynamics, including export restrictions and supply constraints affecting rare earth elements, have highlighted the importance of reducing exposure to potential sourcing disruptions. To address these risks and ensure long-term supply continuity, we have worked closely with our existing supplier to identify and qualify an optimized rare earth chemical composition.

Effective Date of the Change:

August 2026

What You Need to Do:

No action is required from you.

If you have any questions, please feel free to contact your Littelfuse Customer Service or Inside Sales Representative. We appreciate your business and our continued partnership.

Sincerely,

Cristal Furini
