Temporary Order Hold for Selected MST 250 and MXT 250 Part Numbers

General

As part of ongoing production monitoring, certain part numbers are currently under production review due to observed variances in production characteristics from the following product lines:

MST 250 [Data sheet](#)

0034.6620	0034.6720	0034.6820
-----------	-----------	-----------

MXT 250 [Data sheet](#)

0034.6916	0034.6946	0034.6976	0034.6921	0034.6951
0034.6981	0034.6921.1	0034.6923	0034.6953	0034.6983

To ensure consistent product performance, SCHURTER has temporarily paused new orders for selected part numbers while we complete a production-related assessment. The matter is being treated with high priority to ensure continued product reliability.

We will inform you immediately once the affected part numbers are released for order and shipment again.

Activities Sales

Please inform customers who are affected by the listed part numbers about the temporary hold on new orders. Reassure them that SCHURTER products continue to function reliably and that we are taking all necessary steps to resume availability promptly.

Thank you for your understanding and continued support.

Best regards,

Fabio Gallati
