Reason of Change:

☐ Technical requirement   ☐ Change of production process/logistical changes
☐ Customer requirement   ☐ Location of production moved
☐ Quality improvement   ☒ Other: Regulatory requirement

Description of change:	As part of the corporate commitment to maintaining state-of-the-art security of its products, Telit Cinterion will introduce new module releases for the product variants listed in the table above compliant with the applicable, new requirements of EU RED Delegated Act on Cybersecurity (Commission Delegated Regulation (EU) 2022/30), commonly known as "RED Cybersecurity requirements".
	New modules aimed at the European market that are under development at the date of this notification, and will start mass production later, are not listed above, as they will be compliant with RED Cybersecurity requirements since their initial release.
	Different security requirements could apply to the devices integrating the modules, depending on the device typology, the functionalities provided and their intended use.
	Please note that the manufacturers of the devices integrating the modules are responsible for assessing and ensuring the compliance of their products with the applicable legislation.

Schedule details:	The new EU RED Delegated Act on Cybersecurity is entering into force on August 1st, 2025. Telit Cinterion is in the process of certifying the above-mentioned modules against the new regulation. Further notifications to inform about the new ordering part numbers for each product series will follow.
Quality assurance measurements:	The new module releases will fulfil all internal test requirements according to our Quality Management process and philosophy.

If you have any question about the present communication, please contact Telit Cinterion Technical Support or your Regional Sales Representative.
