Ordering Code changes: ☐ Yes ☒ No	
Product	New Ordering Code

Reason of Change:

☐ Technical requirement   ☐ Change of production process/logistical changes
☐ Customer requirement   ☐ Location of production moved
☐ Quality improvement   ☒ Other: UKCA Declaration

| **Description of change:**	After the BREXIT, the British regulatory authorities have decreed that manufacturers and distributors, at the latest from 01.01.2023, must declare with a "UKCA" mark (corresponding to the "CE" mark) that the product meets the applicable requirements in England, Wales and Scotland. In Northern Ireland, the "CE" mark will remain valid. For the time being only a paper declaration is necessary but no additional tests. Thales will deliver the products in the appendix list for the world and European market (W and E variants) in the future with CE and additional UKCA mark. As an example from EXS82-W you can see the old label without UKCA marking and the new label with UKCA marking: Old label without UKCA marking:

	New label with UKCA marking:
	If there are further questions, our FAE team who offers comprehensive customer support, should be contacted.
Schedule details:	during the year 2022 (no later than December 31, 2022) for all products and part numbers mentioned below

Quality assurance measurements:	The new version fulfils all internal test requirements according to our Quality Management process and philosophy.
