Re: Process Operation from Forming PTC ceramic to Spattering Electrode start in China factory

We thank you very much for your continuous business relationship regarding our Thermistor products. Today, we would like to announce that we Murata will start the production from the forming PTC ceramic process to the spattering electrode process for Leaded PTC Thermistor (Posistor) in Wuxi Murata (WME) in China, which has already operated the lead assembly. From July 2012 onwards, we will operate the production both in Yokaichi plant and Wuxi Murata (WME) in China.

1. Subject Murata Leaded PTC Thermistor

**【Parts No.】 PTFM series / PTFL series / PTTL series ,
 PTGL series (Limited Part No.)**

※Please kindly see attachment for the specific part numbers we have been supplying to you since 2007.

2. Content of change

To start the forming / firing / spattering electrode process in Wuxi Murata (WME) in China.

※No change for the products of <Ni-Ag> electrode.

3. Purpose

To ensure a stable supply of our products by concurrent production in both Yokaichi plant and Wuxi Murata in China.

4. Subject production process

Please kindly see the following table:
