2 Type of change

- Modified packaging label
- Improved identification: short text and product configuration code on the label

3 Detailed description of change

The following table describes the modifications applied to the new packaging label. All listed product types share the same packaging label design. To better visualize the modifications, colors and numbers were added to this chapter to cluster information into sections (the colors and white numbers are therefore not part of the new label layout). An old and a new label has been added as an example for visualization.

<p>Product identification section: To improve readability, all the information concerning product identification in this group is clustered. Furthermore, some of the content/ text of the label is subjected to following changes (see highlighted red areas on the labels of the following page):</p> <ul style="list-style-type: none"> • <u>Product Type</u>: added for each part number and has been adapted • <u>Configuration Code</u>: For few part numbers, the configuration code is updated or added (no physical change to the product). • <u>Part Description</u>: For some part numbers the description is added to harmonize description & improve identification. 	1
→ For details on text/ content that has been changed please see list attached to this PCN.	
Product conformity section: Identical information, slightly rearranged.	2
Product logistics section: Identical information, slightly rearranged. "Date" changed to "Date Code".	3
Product approval section: (N/A) No information was featured on old label & no change was implemented.	4
Product rating section: (N/A) No information was featured on old label & no change was implemented.	5
Origin information section: Identical information, slightly rearranged. Factory Code identifier "FC" added.	6
