

# Product/Process Change Notice - PCN 17\_0057 Rev. -

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date. ADI contact information is listed below.

**PCN Title:** DDR Timing Specification Correction in the ADV7181D Datasheet

Publication Date: 29-May-2017

Effectivity Date: 29-May-2017 (the earliest date that a customer could expect to receive changed material)

#### **Revision Description:**

Initial	Re	lease
---------	----	-------

## **Description Of Change**

ADV7181D datasheet Data Output Transition Time DDR specification correction.

Current datasheet (Rev. A) specifies the following DDR (CP) Data Output Transition Time:

Positive clock edge to end of valid data: t15 min = -4 + TLLC/4 nsPositive clock edge to start of valid data: t16 min = 0.25 + TLLC/4 nsNegative clock edge to end of valid data: t17 min = -2.95 + TLLC/4 nsNegative clock edge to start of valid data: t18 min = -0.5 + TLLC/4 ns

Next revision datasheet (Rev. B) will specify the following DDR (CP) Data Output Transition Time:

Positive clock edge to end of valid data: t15 min = 1.9 ns Start of valid data to positive clock edge: t16 min = 1.7 ns Negative clock edge to end of valid data: t17 min = 1.4 ns Start of valid data to negative clock edge: t18 min = 1.7 ns

### Reason For Change

Update datasheet to accurately reflect correct timing specification.

#### Impact of the change (positive or negative) on fit, form, function & reliability

There has been no change to the device silicon, there will be no impact on the device performance.

#### **Summary of Supporting Information**

The ADV7181D Datasheet Rev B will reflect the correct timing specifications.

#### **Supporting Documents**

Attachment 1: Type: Datasheet Specification Comparison
