

Product Change Notice

Issue Date: 12 Nov 2014

Change Type:

Avago Technologies is qualifying an alternate scrambler and painting source for leadframe S4 and Annunciator

Parts Affected:

All S4 and Annunciator, refer below for part numbers list

Description and Extent of Change:

The selected new supplier shall be the alternate choice for existing painting and scrambler supplier. The new painting and scrambler will have the same functionality as the existing part

Reasons for Change:

To ensure continuous supply of all leadframe S4 and Annunciator

Effect of Change on Fit, Form, Function, Quality, or Reliability:

There will be no change of fit and function per product datasheet. New scrambler will have slight color tone different comparing to existing part, refer photo below:

Effective Date of Change:

The shipment with new scrambler will commence 90 days upon PCN issuance date. Each tube will only contain one scrambler source. There will be a mixture of both suppliers' parts within each shipment. Actual implementation by datecode will be advised later

Qualification Data:

All the qualification vehicles submitted to reliability tests passed Avago's stringent reliability test requirements. There were no functional defects observed during the reliability test.

Summary of test results as below:

HDSP-G511, HDSP-U211					
Environmental/Life Test	Reference	Stress Profile	Unites Tested	Units Failed	
Temperature Cycling	Avago Std	-55/100°C 15/5min Dwell/Transfer, 100cyc	231	0	
High Temperature Operating Life	JESD22-A108	55°C, Max Derated Current, 1000hrs	66	0	
High Temperature Humidity Storage Life	Avago Std	85°C, 85% RH, 500hrs	66	0	
Solder Heat Resistance	JESD22-B106	260°C for 10s, 2x	30	0
