

Product Change Notification

INDUCTIVE COMPONENTS

June, 2015

Manufacturing Process Change for Labels on Model 2100, 2200, 2300, 2100HT, 2200HT, 2300HT, PM2110 and PM2120 Toroid Inductor Series

Bourns is changing the product identification label marking method from an ink rubber stamping to an inkjet laser marking on the Model [2100](#), [2200](#), [2300](#), [2100HT](#), [2200HT](#), [2300HT](#), [PM2110](#) and [PM2120](#) Toroid Inductor Series. The new marking method is an automated process which significantly enhances the production rate and reduces operator error. The inkjet laser marking is more legible and has a higher durability than the ink rubber stamping method.

The product identification label marking method change has no impact on the fit, function, quality and reliability of the component.

*Figure 1.
Ink Rubber Stamping Label*

*Figure 2.
Inkjet Laser Marking Label*

A list of affected part numbers is shown in Table 1 on the following pages.

Implementation dates are as follows:

Date that manufacturing with ink rubber stamping will cease: December 31, 2015

Date that deliveries of products with new inkjet laser marking will begin: January 1, 2016

First date code using above changes: 1601

If you have any questions or need additional information, please feel free to contact [Customer Service/ Inside Sales](#).
