ID No. 00661	**Product/Process Change Notification**	Date 25.7.19

Product	**Ordering Code**
PLS62-W Rel.1	**L30960N4600A100**
Ordering No. changes:	☐ Yes ☒ No
New Ordering Code:	

Reason of Change:

☐ Technical requirement   ☐ Change of production process/logistical changes

☐ Customer requirement   ☐ Location of production moved

☒ Quality improvement   ☐ Other:

Description of change:	Gemalto M2M GmbH is going to introduce a new FW to improve the overall system performance of the product. The change concerns FTP/FTPS internet service only, and only customer applications using this particular service will be affected and will benefit out of this change. The impacts to customer applications are the same regardless Java embedded system is used or not. Following modifications have been implemented: 1) Correct judgement to close ftp/ftps data connection, by adding suitable timer that waits for FTP server's feedback. This is to make sure URC is reported correctly. The fix is in JRC midlet only(JRC is a Cinterion's Java internal application, being the integral part of he module's FW). JRC midlet version will be upgraded to 1.62.03. The application revision (ARN) will be upgraded to 01.000.04. SW revision remains the same, 02.000. This change is not approval relevant.
Scheduled date of introduction (cw/year):	CW42 2019
Timing note:	If Gemalto M2M GmbH does not receive a notification to the contrary within a period of 6 weeks, Gemalto M2M GmbH assumes that the customer agrees to the change.

Quality assurance measurements:	The new version fulfils all internal test requirements according to our Quality Management process and philosophy.
