Dear Customer,

3G products – PTCRB certification validity period

The following document serves as a reminder to our customers that the products (listed in Table 1 below) have the PTCRB certification which is valid until 27-Oct-2018.

After the validity date mentioned above, Gemalto will not renew the PTCRB certification, and Gemalto will not do a major software update that would lead to PTCRB certification. Therefore, our customers need to complete all planned certifications before 27-Oct-2018.
