Description of the Change

Cree is changing the cathode mark on the JB5630 3-V Standard and High-Efficacy series LEDs to an anode mark and changing the package height from 0.60 mm to 0.65 mm. Please refer to the latest data sheet on www.cree.com.

The current and new appearances and heights are shown below.

The packages with the cathode mark are limited to parts with bin codes with 06, 16, 0B, or 1B as the last two characters.

The orientation of the polarity of the component in the carrier tape remains unchanged.

Reason for Change

The change is being implemented to achieve back-end efficiency and easier identification of the polarity of the component.

Change Impact on Form, Fit, Function, or Reliability

This has no impact on the function or reliability of the JB5630 3-V Standard and High-Efficacy series LEDs. No customer action is required. This product change does not affect the order codes.
