

## LED Die Change for CLY6D-FKC LEDs

### PCN-CM079

**Announcement Date: March 31, 2016**

**Implementation Date: Immediately**

This notification applies to the following Cree product series:

CLY6D-FKC-xxxxxxx

No customer action is required.

### CHANGE DESCRIPTION

---

Cree has qualified new LED die for use in the CLY6D-FKC SMD LEDs. In the near future, Cree will be switching production of the listed LED entirely to the new die. Cree has analyzed the optical, electrical and thermal properties of the LEDs made with new the die and found them to be identical to the data sheet specifications of the LEDs made with the previous die.

For the best screen appearance, Cree recommends against mixing new die LEDs with previous die LEDs in the same display. For more information concerning this recommendation, please contact your local Cree sales representative.

### IMPACT OF CHANGE

---

Effective immediately, Cree will begin shipments of CLY6D-FKC LEDs with the new die.

No customer action is required.
