Type of Notification: Moisture Sensitivity Level Change for 2920L Series Products

Description of Change:

This is to inform our valued customers that Moisture Sensitivity Level (MSL) is being changed from 1 to 2a for all 2920L series products. The MSL 2a improves product stability under non-ideal storage environment and various logistics transportation.

There are no changes on Form, Fit and Function for the products impacted by this change.

This is a rolling implementation and customers can expect to start receiving products with MSL 2a package from December 1st, 2019.

The affected part list can be found on page 2.

Additional Information

Please contact your local Littelfuse sales representatives if you have any questions on this change notification.
