Product Change Notification LSP05 and LSP10 Series PCN# 4791

Dear Valued Customer,

Littelfuse would like to notify you of product changes relating to **housing outline dimension and wire AWG gauge of LS05 and LSP10 Series**. There will be no other changes to products electrical specification/performance. The complete qualification test reports and production samples are available upon request.

These changes will be implemented from **May 7th, 2018**: during the production transition period, customers are expected to receive both current and new housing and wire products until the existing product inventory in our warehouses and the distribution channels are depleted.

All current sample orders will be made by new housing and wire from this PCN published date.
Please refer attached the detailed housing dimension and wire AWG comparison and the affected part number list.

housing and 16AWG \

20180307 New
housing and 16AWG \

Special Case:

If your current products have problems in converting to the new housing and wire, we would be able to continue current housing and wire parts production for your current products. But, we must create custom part number by adding a suffix code for current standard parts you purchase from Littelfuse to continue current housing and wire parts production. For custom part number registration/creation, please provide your company name, estimated annual usage and part numbers you currently use by **April 7th, 2018**, we will provide you the custom part number and datasheet by **May 7th, 2018**.

Please respond to us by **April 7th, 2018** to acknowledge notification of this change. If we do not hear from you then we will expect this PCN has been accepted and no further action is required. Thank you!

Best Regards
Johnny Chang
