

03 August 2020

Product Change Notice

Type of Change: End of Life Material Change
 Facility Change or Addition Process Change
 Design Change Other- Packaging

Part Series Affected: W Series Heatsinks

Part Numbers: WA-T247-101E, WV-T247-101E, WA-T220-101E, WV-T220-101E

Effective Date: August 3, 2020

the Ohmite WA-T247-101E, WV-T247-101E, WA-T220-101E, and WV-T220-101E heatsinks will be supplied on trays, as they are currently, but with the added protection of a moisture sealed bag. While the heatsinks are not MSL rated, like all electronics components, extended exposure to humidity will erode the solderability of their terminals. The process of terminal oxidation is accelerated in high humidity environments due an abundance of oxygen molecules present. This precautionary packaging improvement will reduce the effect of humidity during transport and storage. No changes to price of standard pack quantities are involved with this packaging change.

Best Regards,
