| <input checked="" type="checkbox"/> Quality improvement | <input type="checkbox"/> Other: |

Description of change:	<p>Gemalto introduces a new version of the EHS6T USB terminal that offers modified GPIO assignment – in reference to the existing documentation (Hardware Interface Description, HID), GPIO 22 and 23 will be made available on the 8-pole GPIO connector instead of GPIO 14 and 15.</p> <p>In addition, the default configuration of the watchdog controller/GPIOs will be changed to "all input", to be identical with the factory delivery status.</p> <p>These GPIO-related minor changes are not approval relevant.</p>
Scheduled date of introduction (cw/year):	02/2015
Timing note:	If Gemalto M2M GmbH does not receive a notification to the contrary within a period of 6 weeks, Gemalto M2M GmbH assumes that the customer agrees to the change.

Quality assurance measurements:	The new version fulfils all internal test requirements according to our Quality Management process and philosophy.
