#### Notice of Marking Specification Change on our products

Thank you for your continuous attention on our semiconductor products. We are going to change the specification of the mark on our products. Please refer to the details as follows.

#### [Scope of applicable packages]

G1F, 1F, 2F, M1F, M2F

#### [Content of changing]

The new specification is 4 digits, adding Control number [2 digits] to actual Lot number [2 digits]. (Please refer to the attached document for details.)

#### [Behind of changing]

We intend to take actions rapidly and correctly in the case of defect occurrence.

#### [Beginning date]

G1F, 1F, M1F package: Production in Oct. 2015 2F, M2F package: Production in Dec. 2015

### 1F Package (Products of change in type code and layout)

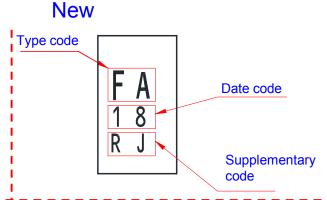

Current

#### VR61F1

Change in layout of marking and replace F1 with FA.

Add supplementary code of 2 digits, into production lot discernment code of 4 digits.

# Type code Date code

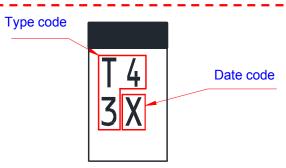

#### ST04-14F1 etc.

Change in layout of marking and replace [T43] with [TJ].

Use date code of 2 digits instead of 1 digit, and add supplementary code of 2 digits.

Those changes are applied to 4 products including ST04-14F1.

Refer to a table in right for the changes of type code.

| 7 | Type code | T J 1 8 | Date code          |
|---|-----------|---------|--------------------|
|   |           | R J     | Supplementary code |

| Product   | Type code (current) | Type code (new) |
|-----------|---------------------|-----------------|
| ST04-14F1 | T43                 | TJ              |
| ST04-16F1 | T41                 | TK              |
| ST04-18F1 | T44                 | TL              |
| ST04-24F1 | T42                 | TM              |

## 2F Package

New Current Type code Type code 3 F V Date code Date code 2 Supplementary code RJ

No change in type code.

Move type code upward by decreasing the cathode mark in size. Add supplementary code of 2 digits, into production lot discernment code of 4 digits.
