4. Description of change

	Old	New
4.1 Description	LAAT Technology	HBIP40 Technology
4.2 Anticipated Impact on form,fit, function, quality, reliability or processability?	No changes in term of Quality and Reliability. Negligible changes in the Electrical Characteristics (see Datasheet).	

5. Reason / motivation for change

5.1 Motivation	<p>Following Divisional commitment towards a continuous improvement philosophy, a more fine geometry Bipolar technology has been qualified in ST called HBip40. As already done for the L78xx series, ST is going to use this improved technology to redesign the L79xx Linear Voltage Regulator series also.</p> <p>Electrical characteristics remain unchanged. Quality and Reliability parameters are still guaranteed at the same level as in the past. Small differences in the Short Circuit Current value (see details in the datasheet) further minimize the risk of circuitry damage in case of Short Circuit conditions, especially to those devices connected downstream of our IC.</p> <p>The new L79 series (see involved part numbers) in HBip40 will be produced taking into account the change of Back Metal Conversion from Cr/Ni/Au to Cr/Ni/Ag already announced with the PCN AMG/16/9855 [Back Metal Conversion from Cr/Ni/Au to Cr/Ni/Ag for Bipolar Technology in Ang Mo Kio (Singapore) FE plant] .</p> <p>The above changes will increase our flexibility on confirming orders that will be translated in a better service to our Customers.</p> <p>Samples of L7912CV and L7912CV-DG are available for customer evaluation. The other versions will come later and according to customer requests.</p>
5.2 Customer Benefit	SERVICE IMPROVEMENT
