

PRODUCT TERMINATION NOTIFICATION

PTN 9011 - Annex 1 Portfolio rationalization for both ST6 and ST7 non-automotive microcontroller families

MMS - Microcontrollers Division (MCD)

Dear Customer,

In an established manufacturing line, Quality and service are very dependent of production stability which is directly correlated to the volumes produced.

Few ST6 and ST7 devices are produced in such low volume that it will not allow us to guaranty the level of Quality and service required by the customers.

Therefore, we would like to inform you that ST Microcontrollers Division has decided to initiate the product termination of products listed below.

Should you have any question relative to product termination, please refer to our ST sales representatives.

With our sincere regards.

Michel Buffa

Microcontroller Division General Manager
