

14 September 2018

Dear Customer

We have been informed by our supplier STUDIOMATE that mono socket **A11F520N** is to be discontinued with immediate effect. This discontinuation is due to reduced demand for this product making it not viable for the manufacturer to reinvest in new tooling now the existing tooling is beyond its serviceable life.

There is no direct alternative available at this time however we suggest customers evaluate part number **621035** as a possible alternative. Please contact Anglia if you require samples of the suggested alternative.

Please ensure the relevant person(s) in your purchasing and engineering departments are made aware of this discontinuation to avoid disruption in your manufacturing.

Yours Sincerely

Anglia
