

22 January 2014

Dear Customer

We have been informed by the supplier CTC that production on their Axial capacitor products is to be discontinued. The reason for this discontinuance is that the production equipment has gone beyond its serviceable life and unfortunately due to low worldwide demand for Axial products it is not commercially viable for CTC to commission a new line and continue production.

Below is a complete list of all part numbers affected by this change.

Unfortunately there is no direct alternative in Axial format however electrically equivalent alternatives are available in Radial format; please contact our office for further information. However, we are able to offer an alternative in Axial format to the discontinued CTC range, please contact our office for further information.

There is an opportunity for a last time buy from CTC before production is phased out, please contact us with your requirements before 28.2.14. After this date any remaining free stock of these devices will be available on a first come first served basis until the stocks have been exhausted, please contact our sales desk with your requirement ASAP.

Please make the relevant person(s) in your purchasing and engineering departments aware of this change to prevent disruption to your production schedule.

Anglia
