This notification applies to the M10264 RF Antenna Module and M10264-K1 Evaluation Kit

**Subject: End-Of-Life (EOL) Notice  
M10264-XX RF Antenna Modules and M10264-K1 Evaluation Kits**

14th May, 2010

Dear Antenova Customer/Partner;

I write to advise you of some recent developments regarding Antenova's M10264-XX RF Antenna Modules that will have impact on future availability of the device. The reason for this notification is that we have been informed by SiRF of the scheduled end-of-life of the SiRFstarIII GSC3LTF devices.

First and foremost, we would like to assure you that we are making all reasonable efforts to ensure sufficient stock of the devices to fulfill your production requirements. However, to ensure guaranteed availability of the M10264-XX module for all your product requirements we will require you to place purchase orders for the quantities required for your full production runs by the last time order date of 20th June 2010.

We appreciate that this is very short notice and apologize for any inconvenience. Antenova will commit to delivery and payment terms for such orders beyond the order date up to 31<sup>st</sup> March 2011. However, last time orders are non-re-schedulable, non-cancelable and non-returnable.

For your next generation products, we are pleased to offer you the M10372 RF Antenna Module which incorporates the next generation of SiRFstar GPS architecture. The M10372 has the same physical size and footprint as the M10264, providing an easy migration path to the new module with added advanced features.

Your Antenova sales representative will be in contact in the following days to discuss your order requirements for the M10264 and answer any questions you may have about migrating your designs to the M10372 module. As always, please do not hesitate to contact me directly if you have any questions or concerns in the meantime. We appreciate your business and look forward to continued mutual success.

Sincerely,

*A Canilao*
