Phase-out of a subset of the MSM family

General

SCHURTER has invested significantly in the automation and digitalization of its production facilities, process development and in production plant engineering. These innovations enabled the launch of a new generation of MSM II push buttons with improved technical properties.

The MSM push buttons (Momentary) are being replaced by the new series **MSM II**, while the MSM switches (Latching) will continue to be available in the portfolio.

Phase-out Procedure / Time Schedule

Most of the **MSM** push button variants will be replaced one-to-one by the new **MSM II** variants. A list of the discontinued variants and information on the replacement variants can be found in the appendix.

Orders are accepted until 31st January 2024 with last delivery before 30th November 2024.

Activities Sales

Please inform your customers about the phase-out process.

Best regards,

Anette Riedl-Materna
