

29 November 2019

Dear Customer

We have been advised by the Taicom factory that the tooling used for crimp terminal socket and pin contacts with the following wire sizes are beyond their serviceable life: **16 to 22** and **24 to 26** AWG. Unfortunately, it is not commercially viable to repair or open a new tool.

There is no direct wire gauge (AWG) rating replacement but we recommend moving over to one of the following options for socket and pin contacts:

<i>Crimp Terminals (open barrel) – Socket Contact</i>					
Discontinued Parts			Replacement Options		
Reel	Loose	AWG	Reel	Loose	AWG
n/a	TM4014	16-22	TM4012	TM4022	18-24
TM4011	TM4013	24-26	TM4010	TM4020	22-28

<i>Crimp Terminals (open barrel) – Pin Contact</i>					
Discontinued Parts			Replacement Options		
Reel	Loose	AWG	Reel	Loose	AWG
TM4017	TM4019	16-22	TM4021	TM4023	18-24
TM4016	TM4018	24-26	TM4024	TM4025	22-28

Limited stocks are available until exhausted and on a first come first served basis, please contact your Internal Account Manager or our sales desk ASAP to secure any remaining stocks.

Please make the relevant person(s) in your purchasing and engineering departments aware of this change to prevent disruption to your production schedule.

Yours Sincerely

Anglia
