## IATA Lithium Transportation New Part Number Update

Dear Customer

We have been advised by VARTA that due to new regulations regarding airfreight shipments which came into effect from 1<sup>st</sup> April, Lithium-ion batteries must comply with a state of charge (SoC) not beyond 30% of their rated capacity.

In order to meet the ≤30% requirement, other factors regarding shelf-life and meeting the supply chain had to be taken into consideration for air shipment. As a result new order codes for the CellPac LITE product range have now been released for select parts which don't meet this requirement. Below is a summary table of the old and new part numbers which will change with immediate effect.

<b>OLD Part Number (50%)</b>	<b>Description</b>	<b>New Part Number (30%)</b>
56637201014	1/LIC18650-26 HC PCM S WC	56637201016
56637502013	2S/LIC18650-26 HC PCM S WC	56637502016
56637502014	2P/LIC18650-26 HC PCM S WC	56637502017
56429201015	1/LIP103450 SC PCM S WC	56429201016

Further information from VARTA regarding these changes is attached separately.

Please make the relevant person(s) in your purchasing and engineering departments aware of this change to prevent disruption to your production schedule.

Yours Sincerely

Anglia
