

Changes in dimensions and appearance for straight over-moulded connectors of the 709 series

Dear Sir/Madam,

We would like to inform you about **changes in our 709 connector series**.

As part of our continuous product improvement and a tool renewal, we are making **adjustments to the straight overmoulded connectors of the 709 series**. These adjustments **concern the dimensions and the appearance**.

The changes serve to **improve quality and enable easier handling**. Since there are **no more grooves and elevations that allow dirt to accumulate**, the field of application is extended even further.

As a result of these modifications nothing changes for your application. The new connectors can be used 1:1.

The **adjustments to the dimensions are in the range of a tenth**. The optical change can be seen in the picture and drawing on the following page.

Old overmoulding

New overmoulding

In the course of this, the article numbers of our standard articles will also be adjusted. The following standard articles will receive new numbers:

Customised articles retain their previous 79 numbers and are only affected by the design change.

The changes will be initiated **from May 2023 and will be completed in the following months, depending on the products in stock.** An exact date cannot be given here.

Do you still have questions? Please reply to this email, we will be pleased to assist you.

Kind regards
