

## **Declaration of Compliance**

### **California Proposition 65 (Prop65)**

**Prepared for:** Anglia Components

Isocom Components 2004 Ltd is committed to providing safe and compliant products to our customers worldwide. California Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, requires businesses to provide warnings for products containing certain chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm, unless exposure levels are below established safe harbour limits.

We confirm that, based on all information available to us, the substances listed under California Proposition 65 are either not present in the listed articles or are present in a manner that does not require a warning under the regulation's safe harbour provisions.

This declaration is based on information provided by our suppliers and our internal assessments. We are committed to maintaining compliance with legislation and will continuously monitor any changes in regulations or the composition of our products.

An updated list of the substances regulated under California Proposition 65 can be found at: [California Proposition 65 List](#). Additional information can be found at [About Proposition 65](#).

This statement is valid for the articles listed on page two of this document and is correct as of the date below. While we strive for accuracy, this declaration does not constitute an absolute guarantee or warranty of compliance. Should you require further information or clarification regarding our compliance status, please do not hesitate to contact us at [compliance@isocom.co.uk](mailto:compliance@isocom.co.uk).

Dated: 28<sup>th</sup> August 2025

Alisha Jones  
Compliance & General Administrator

Article Part Numbers Included in this Declaration:

All Part Numbers supplied by Isocom as of 28/08/2025

Some of our optoelectronic components contain Gallium Arsenide (GaAs), Antimony Trioxide, and/or TGIC, which are listed under Proposition 65. However, in these cases:

- The materials are fully encapsulated within multiple protective layers.
- There is no risk of user exposure under normal operation, handling, or disposal.
- Inhalation, ingestion, or direct contact is only a risk if the device is deliberately pulverised or destroyed in an abnormal manner.

Therefore, our products do not require a Proposition 65 warning label under the safe harbour provisions.

Note: Isocom Components 2004 Ltd offers a wide range of products compliant with various regulations and standards. This declaration has been created specifically to cover the parts requested and is not representative of our entire compliant product range. For more information, please contact us at [compliance@isocom.co.uk](mailto:compliance@isocom.co.uk).
