

# COMPLIANCE CONFIRMATION

**The supplier**

Titan Opto

**Have advised Anglia Components Plc the following regarding the restrictions on the seven rare earth minerals samarium, gadolinium, terbium, dysprosium, lutetium, scandium, and yttrium:**

Our products contain only a very small amount of rare earth elements in the phosphor materials used. The quantity involved is extremely limited, and the actual proportion within our products is minimal.

At this time, we have not received any notification from customs regarding export restrictions. Therefore, the current regulatory measures have no impact on our shipments or production.

We will continue to monitor the situation closely and will inform you immediately should there be any relevant developments.

**Person**

Steve Arnold

**Position**

Health & Safety Manager, Compliance Auditor
