Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) of 18 December 2006

Regulation 1907/2006 bases on the principle "no data, no market". In consequence, chemical substances may, stepwise depending on the produced or imported amount, only be marketed if they got registered before.

HARTING is manufacturer of articles and not of substances or preparations. Thus HARTING has the role of the "downstream user" according to Art. 3 cipher 13. Therefore there is no duty or possibility for the (pre-) registration of substances.

In article 57 criteria are regulated by which a substance can be taken up in annex XIV and therefore become subject of authorization. Before substances are included in annex XIV they are listed on the so called "candidate list". The list of these "substances of very high concern" (SVHC) can be viewed at: <http://echa.europa.eu/de/candidate-list-table>

Article 33 of the regulation rules the "Duty to communicate information on substances in articles". This means in particular that any supplier of an article has to inform the recipient if a SVHC is contained in a concentration above 0,1% weight by weight by at least providing the name of the substance.

HARTING is in close contact with the suppliers and got from them the confirmation that the duties of article 33 have been understood and implemented.

To the actual knowledge and based on information from the suppliers none of the HARTING products contains REACH Annex XIV listed substances above 0.1% weight by weight.

To the actual knowledge and based on information from the suppliers none of the HARTING products contains REACH Annex XVII listed substances above 0.1% weight by weight for E&E products.

HARTING is aware of the duty to communicate information according to REACH article 33 and will fulfill it either on customer contract agreements or on the HARTING homepage with article number reference.
