

As part of our commitment to providing customers with the widest choice of Taicom product we are able to offer their comprehensive cable assembly service. Covering a vast array of connector lines, many of which are detailed in this Product Guide, the assembly methods employed by Taicom ensure consistent quality and reliability. All cable assemblies are rigorously tested throughout every stage of manufacture and subject to a final 100% test before despatch.

## VALUE ADDED

For details of price and availability, contact the **anglia** Sales Desk. Please have the following information to hand:

- description and part number(s) of the relevant connector(s)
- cable/wire length including tolerance
- details of any additional special requirement
- quantity required and delivery timescale

After receipt of the above information we will supply an engineering drawing for your approval. Once your requirement is confirmed samples can be provided, typically within 2 weeks.
