Product Change Notice (PCN)

November 9th, 2021

Product Change Notification for SM7 Varistor Series: PCN 5934E

To whom it may concern,

Littelfuse would like to notify you of a change related to SM7 Varistor Series:

We are adding/qualifying a new molding material as an alternative solution for SM7 Varistor Series to secure raw material supply and continue product production and delivery.

Existing and New/Alternative Material Summary

Change Item	Existing Material	New/Alternative Material
Molding Material	PPS1140A7	PPS1680

According our thorough qualification test, the alternative molding material will maintain current product's original electrical parameters, mechanical/dimensional specification, color, quality, reliability, and performance.

The alternative molding material will be used for production from **January 1st, 2022**.

Please see the following affected part numbers and respond to us by **December 1st, 2021** to acknowledge this product change notification. If we do not hear from you, we will expect that this product change notification has been accepted and no further action is required. Thank you.
